

PROJECT: Upgrading and operation of geodetic monitoring networks in the wider area of the Santorini volcanic complex belongs to SRSGE-NTUA

SCIENTIFIC DIRECTOR: D. Anastasiou

DURATION (MONTHS): 14 months

DEPARTMENT: Department of Topography

FINANCIER: OASP

DESCRIPTION: This research project concerns the expansion and upgrade of the geodetic monitoring GNSS network in the wider area of Santorini volcano, established by the NTUA. The project will include the procurement and installation of a new geodetic GNSS station in Santorini, as well as the procurement of all necessary equipment, consumables and telecommunication services for the upgrade of the existing network and its maintenance so that it can operate and its data can be made available in almost real time to the entire scientific community. The project also includes the necessary travel costs for the installation and maintenance of the network.
